

IEEE TRANSACTIONS ON APPLIED SUPERCONDUCTIVITY

A PUBLICATION OF THE IEEE SUPERCONDUCTIVITY COMMITTEE

MARCH 2002

VOLUME 12

NUMBER 1

ITASE9

(ISSN 1051-8223)

THE SEVENTEENTH INTERNATIONAL CONFERENCE ON MAGNET TECHNOLOGY

Hosted by CERN, the European Organization for Nuclear Research
Geneva International Conference Centre (CICG), September 24-28, 2001

Chairman's Introduction	17
Welcome Address by Mr. Carlo Lamprecht, Geneva Canton and Republic State Council President	21
Welcome Address by Professor L. Maiani, CERN Director-General	22
Closing Address by Prof. Maurice Bourquin, Rector of Université de Genève, Président of CERN Council	23
Message from the MT17 Editorial Board Chairman	25
Organizing Committees	27
List of Exhibitors	28
List of Sponsors	29
Group Photograph	30

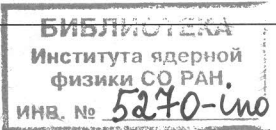

Accelerator Magnets: Superconducting, Conventional, Permanent

Loss and Dynamic Magnetic Field Measurements in LHC Dipoles	
. <i>A. Akhmetov, S. Amet, I. Balaazi, L. Bottura, M. Gateau, P. Pugnât, and L. Walckiers</i>	31
Development of Superconducting Tuning Quadrupole Corrector (MQT) Prototypes for the LHC.	
. <i>M. Allitt, S. A. Arshad, A. Hobl, A. Ijspeert, M. Karppinen, D. Krischel, J. Mazet, J. Salminen, M. Schillo, R. Senis, and L. Walckiers</i>	35
R&D for a Single-Layer Nb ₃ Sn Common Coil Dipole Using the React-and-Wind Fabrication Technique	
. <i>G. Ambrosio, N. Andreev, E. Barzi, P. Bauer, D. R. Chichili, K. Ewald, S. Feher, L. Imbasciati, V. V. Kashikhin, P. J. Limon, L. Litvinenko, I. Novitski, J. M. Rey, R. M. Scanlan, S. Yadav, R. Yamada, and A. V. Zlobin</i>	39
Technical Innovations for a High Gradient Quadrupole Electromagnet Intended for High Power Proton Drift Tube Linacs	
. <i>P.-E. Bernaudin, O. Delferrière, M. Painchault, and C. E. A. Saclay</i>	43
A New Support Structure for High Field Magnets	
. <i>R. R. Hafalia, P. A. Bish, S. Caspi, D. R. Dietderich, S. A. Gourlay, R. Hannaford, A. F. Lietzke, N. Liggins, A. D. McInturff, G. L. Sabbi, R. M. Scanlan, J. O'Neill, and J. H. Swanson</i>	47
Multipoles of the SLS Storage Ring: Manufacturing and Magnetic Measurements	
. <i>E. I. Antokhin, A. M. Barakov, I. N. Churkin, V. V. Demenev, A. B. Dodonov, O. B. Golubenko, V. N. Korchuganov, E. B. Levicev, S. F. Mikhailov, A. B. Ogurtsov, A. V. Philipchenko, L. Rivkin, E. S. Rouvinski, S. I. Rouvinski, K. K. Schreiner, E. P. Semenov, S. R. Singatulin, D. A. Skorobogatov, A. G. Steshov, A. V. Sukhanov, V. A. Ushakov, Ch. Vollenweider, and J. A. Zichy</i>	51
Construction and Measurement of the Pre-Series Twin Aperture Resistive Quadrupole Magnet for the LHC Beam Cleaning Insertions.	
. <i>G. de Rijk, S. Bidon, E. Boter, G. S. Clark, O. Hans, M. Racine, and A. Salinas</i>	55

(Contents Continued on Page 2)

Quench Performance and Mechanical Behavior of the First Fermilab-Built Prototype High Gradient Quadrupole for the LHC Interaction Regions	<i>N. Andreev, T. Arkan, P. Bauer, R. Bossert, J. Brandt, J. Carson, S. Caspi, D. R. Chichili, J. DiMarco, S. Feher, A. Ghosh, H. Glass, J. Kerby, M. J. Lamm, A. Makarov, A. D. McInturff, T. Nicol, A. Nobrega, I. Novitski, D. Orris, T. Peterson, R. Rabehl, W. Robotham, R. Scanlan, P. Schlabach, C. Sylvester, J. Strait, M. Tartaglia, J. C. Tompkins, G. Velev, S. Yadav, and A. V. Zlobin</i>	59
Design of the Magnetic Channels for the RIKEN Superconducting Ring Cyclotron	<i>S. Fujishima, A. Goto, H. Okuno, and Y. Yano</i>	63
Post-LHC Accelerator Magnets	<i>S. A. Gourlay</i>	67
R&D for Accelerator Magnets with React and Wind High Temperature Superconductors	<i>R. Gupta, M. Anerella, J. Cozzolino, J. Escallier, G. Ganetis, A. Ghosh, M. Harrison, A. Jain, A. Marone, J. Muratore, B. Parker, W. Sampson, and P. Wanderer</i>	75
Interaction Region for VLHC	<i>R. Gupta and M. Harrison</i>	81
Field Decay and Snapback Measurements Using a Fast Hall Plate Detector	<i>M. Haverkamp, L. Bottura, E. Benedico, S. Sanfilippo, B. ten Haken, and H. H. J. ten Kate</i>	86
Principles Developed for the Construction of the High Performance, Low-Cost Superconducting LHC Corrector Magnets	<i>A. Ijspeert, M. Allitt, A. Hilaire, M. Karppinen, J. Mazet, J. Perez, J. Salminen, M. Karmarkar, and A. Puntambekar</i>	90
A Design for a Wide-Aperture 90° Bending Magnet for Heavy-Ion Cancer Therapy	<i>A. Kalimov, B. Langenbeck, and C. Mühle</i>	94
Dynamic Processes in Laminated Magnets: Simulation and Comparison with Experimental Results	<i>A. Kalimov, F. Klos, B. Langenbeck, and G. Moritz</i>	98
Inner Triplet Corrector Package MQSXA for the LHC	<i>M. Karppinen, J. C. Perez, and R. Senis</i>	102
Magnetic Designs and Field Quality of Nb ₃ Sn Accelerator Magnets	<i>V. V. Kashikhin and A. V. Zlobin</i>	107
Superconducting Superferric Dipole Magnet with Cold Iron Core for the VLHC	<i>G. W. Foster and V. S. Kashikhin</i>	111
Experimental Study of a Prototype Dipole Magnet with Iron at $T = 80$ K for the GSI Fast Cycling Synchrotron	<i>N. Agapov, S. Averichev, A. Donyagin, I. Eliseeva, I. Karpunina, H. Khodzhbagiyani, A. Kovalenko, G. Kuznetsov, V. Kuzichev, G. Moritz, C. Muehle, P. Nikitaev, and A. Starikov</i>	116
The Bending Magnets for the LHC Injection Transfer Lines	<i>V. Anashin, A. Bulygin, S. Labutsky, V. Mejidzade, S. Mikhailov, Y. Pupkov, E. Rouvinsky, B. Sukhina, W. Kalbreier, G. Kouba, K. M. Schirm, E. Weisse, Y. Konstantinov, M. Kosjakin, and V. Peregud</i>	120
Test Results of HTS Dipole	<i>A. I. Ageev, I. I. Akimov, A. M. Andriishchin, I. V. Bogdanov, S. S. Kozub, K. P. Myznikov, D. N. Rakov, A. V. Rekudanov, P. A. Shcherbakov, P. I. Slabodchikov, A. A. Seletsky, A. K. Shikov, V. V. Sytnik, A. V. Tikhov, L. M. Tkachenko, and V. V. Zubko</i>	125
Development of High Field Permanent Magnet	<i>M. Kumada, T. Fujisawa, Y. Hirao, Y. Iwashita, M. Endo, M. Aoki, T. Kohda, I. Bolshakova, and R. Holyaka</i>	129
Quench Protection of the Fermilab-Built LHC Inner Triplet Quadrupole MQXB	<i>R. Bossert, R. Carcagno, L. Chiesa, S. Feher, J. Kerby, M. J. Lamm, A. Nobrega, D. Orris, P. Schlabach, M. Tartaglia, J. C. Tompkins, and A. V. Zlobin</i>	133
The High Current Stripper, the Charge Separator, and Their Magnets for the Beam Transfer Line to the Heavy Ion Synchrotron SIS.	<i>B. Langenbeck and J. Glatz</i>	137
The Influence of Accelerator Physics on the Magnet Design of a Very Large Hadron Collider	<i>P. Bauer, M. Dietrich, G. W. Foster, V. V. Kashikhin, P. J. Limon, V. Shiltsev, and N. Solyak</i>	142
ALS Superbend Magnet Performance	<i>S. Marks, J. Zbasnik, W. Byrne, D. Calais, M. Chin, R. DeMarco, M. Fahmie, A. Geyer, J. Krupnick, F. Ottens, J. A. Paterson, P. Pipersky, D. A. Robin, R. D. Schlueter, C. Steier, and A. Wandesforde</i>	149
New Chicane Magnet Design for Insertion Device Straights at the Advanced Light Source	<i>S. Marks, R. Schlueter, D. Anderson, W. Gath, J. Y. Jung, D. Robin, C. Steier, and T. Stevens</i>	153
Development of Superconducting Focusing Quadrupoles for Heavy Ion Drivers	<i>N. Martovetsky, R. Manahan, and A. F. Lietzke</i>	157
Optimization of a Superferric Nuclotron Type Dipole for the GSI Fast Pulsed Synchrotron	<i>A. D. Kovalenko, A. Kalimov, H. G. Khodzhbagiyani, G. Moritz, and C. Mühle</i>	161
Correction Multipoles for the High Current Operation of the Heavy Ion Synchrotron SIS	<i>C. Mühle and R. Lotz</i>	166
Quench Protection Study of a Prototype for the LHC Low-Beta Quadrupole Magnets	<i>T. Nakamoto, E. E. Burkhardt, T. Ogitsu, A. Yamamoto, T. Shintomi, and K. Tsuchiya</i>	170
Fabrication and Mechanical Behavior of a Prototype for the LHC Low-Beta Quadrupole Magnets	<i>T. Nakamoto, T. Orikasa, Y. Ajima, E. E. Burkhardt, T. Fujii, E. Hashiguchi, N. Higashi, H. Hirano, T. Kanahara, N. Kimura, S. Murai, W. Odajima, T. Ogitsu, N. Ohuchi, O. Oosaki, T. Shintomi, K. Sugita, K. Tanaka, A. Terashima, K. Tsuchiya, and A. Yamamoto</i>	174

LHC Interaction Region Quadrupole Cryostat Design and Fabrication . . .	<i>T. H. Nicol, C. Darve, Y. Huang, and T. M. Page</i>	179
Status of the LHC Low-Beta Insertion Quadrupole Magnet Development at KEK.	<i>T. Ogitsu, T. Nakamoto, N. Ohuchi, Y. Ajima, E. Burkhardt, N. Higashi, H. Hirano, M. Iida, N. Kimura, H. Ohhata, K. Tanaka, T. Shintomi, A. Terashima, K. Tsuchiya, A. Yamamoto, T. Orikasa, S. Murai, and O. Oosaki</i>	183
Magnetic Field Measurements of the Prototype LHC-IR MQXA at 1.9 K	<i>N. Ohuchi, H. Hirano, Y. Ajima, T. Nakamoto, T. Ogitsu, N. Kimura, T. Shintomi, K. Tsuchiya, and A. Yamamoto</i>	188
Design and Fabrication of the Superconducting Bending Magnet for the Injection System of the RIKEN SRC	<i>H. Okuno, S. Fujishima, T. Tominaka, A. Goto, and Y. Yano</i>	192
The LHC Insertion Magnets	<i>R. Ostojic</i>	196
A Novel Idea for Coil Collar Structures in Accelerator Superconducting Magnets	<i>P. Fessia and D. Perini</i>	202
Septum-Magnet for the Main Extraction Line of the Tesla Linear Collider	<i>E. Bondarchuk, N. Doinikov, B. Kitaev, Y. Konstantinov, V. Lokiev, V. Muratov, A. Nikiforov, V. Peregud, A. Petrov, K. Sinram, and N. Walker</i>	207
Performance of the LHC Final Prototype and First Pre-Series Superconducting Dipole Magnets	<i>L. Bottura, G. D'Angelo, M. Gateau, P. Legrand, M. Modena, K. Naoui, D. Perini, P. Pagnat, S. Sanfilippo, F. Savary, W. Scandale, A. Siemko, P. Sievers, G. Spigo, J. Vlogaert, and C. Wyss</i>	211
Magnetic Field Error Analysis of a Low- β Quadrupole Magnet.	<i>M. Qiu, N. Ohuchi, K. Tsuchiya, T. Nakamoto, T. Shintomi, T. Ogitsu, Y. Ajima, and A. Yamamoto</i>	215
State-of-the Art Superconducting Accelerator Magnets.	<i>L. Rossi</i>	219
The Coil of the MBI Bending Magnets for the LHC Injection Transfer Lines	<i>S. Labutsky, V. Mejidzade, Y. Pupkov, E. Rouvinsky, and B. Sukhina</i>	228
First Powering of the LHC Test String 2	<i>F. Bordry, D. Bozzini, K. Dahlerup-Petersen, R. Denz, B. Puccio, A. Rijllart, F. Rodriguez-Mateos, R. Saban, R. Schmidt, L. Serio, and H. Thiesen</i>	232
Status of Nb ₃ Sn Accelerator Magnet R&D	<i>G. L. Sabbi</i>	236
Opposite Field Septum Magnet System for the Separation of Charged Particle Beams	<i>I. Sakai, Y. Arakaki, M. Tomizawa, Y. Shirakabe, M. Muto, Y. Mori, Y. Ishi, and S. Fukumoto</i>	242
Measurement and Analysis of the Field Quality of LHC Prototype and Pre-Series Superconducting Dipoles	<i>M. Aleksa, S. Amet, Z. Ang, L. Bottura, M. Buzio, P. Ferracin, O. Pagano, V. Remondino, S. Russenschuck, S. Sanfilippo, W. Scandale, and E. Todesco</i>	247
Training Quench Performance and Quench Location of the Short Superconducting Dipole Models for the LHC	<i>S. Sanfilippo, A. Siemko, D. Tommasini, and W. Venturini-Delsolaro</i>	251
Field Measurement of a Fermilab-Built Full Scale Prototype Quadrupole Magnet for the LHC Interaction Regions.	<i>R. Bossert, R. Carcagno, J. DiMarco, S. Feher, H. Glass, J. Kerby, M. J. Lamm, A. Nobrega, T. Nicol, T. Ogitsu, D. Orris, T. Page, R. Rabehl, G. Sabbi, P. Schlabach, J. Strait, C. Sylvester, M. Tartaglia, J. C. Tompkins, G. Velez, and A. V. Zlobin</i>	254
Investigation of the Periodic Magnetic Field Modulation in LHC Superconducting Dipoles.	<i>P. Pagnat, T. Schreiner, and A. Siemko</i>	258
Development of Fast Extraction Kicker Magnet for Booster Synchrotron of Indus-1	<i>R. S. Shinde, M. G. Karmarkar, R. R. Yadav, and A. S. Rajarao</i>	262
Test Results of the Third LHC Main Quadrupole Magnet Prototype at CEA/Saclay	<i>F. Simon, C. Gourdin, T. Schild, J. Deregel, A. Devred, B. Hervieu, M. Peyrot, J. M. Rifflet, T. Tortschanoff, T. Ogitsu, and K. Tsuchiya</i>	266
High Reliability Prototype Quadrupole for the Next Linear Collider	<i>C. E. Rago, C. M. Spencer, Z. Wolf, and G. Yocky</i>	270
A Superconducting Focusing Solenoid for the Neutrino Factory Linear Accelerator	<i>M. A. Green, V. Lebedev, and B. P. Strauss</i>	274
Development of Radiation-Resistant Magnets for JHF Project.	<i>K. H. Tanaka, E. Kusano, K. Agari, Y. Sato, M. Minakawa, H. Noumi, Y. Yamanoi, M. Ieiri, Y. Katoh, Y. Suzuki, M. Takasaki, T. Birumachi, S. Tsukada, Y. Saitoh, K. Yahata, K. Katoh, and H. Tanaka</i>	278
Design and Fabrication Study on the TESLA500 Superconducting Magnets.	<i>F. Toral, L. García-Tabarés, J. Etxeandía, R. Iturbe, and S. Wolff</i>	282
Launching of Series Fabrication of the LHC Main Quadrupoles	<i>R. Burgmer, R. Bussjäger, D. Krischel, M. Peyrot, J.-M. Rifflet, P. Schmidt, F. Simon, and T. Tortschanoff</i>	287
Degaussing and Decay Reduction in the Short Superconducting Dipole Models for the LHC.	<i>W. Venturini Delsolaro, L. Bottura, M. Haverkamp, and A. Kuijper</i>	291
Field Quality of the Short Superconducting Dipole Models for the LHC	<i>W. V. Delsolaro, Z. Ang, L. Bottura, S. Sanfilippo, A. Siemko, D. Tommasini, and L. Walckiers</i>	295

Adjustable Permanent Quadrupoles Using Rotating Magnet Material Rods for the Next Linear Collider	<i>J. DiMarco, G. W. Foster, W. Fowler, V. S. Kashikhin, A. Makarov, C. E. Rago, A. Ringwall, C. M. Spencer, V. Tsvetkov, J. T. Volk, and Z. Wolf</i>	301
Completion of Superconducting Magnet Production at BNL for the HERA Luminosity Upgrade	<i>P. Wanderer, M. Anerella, J. Escallier, A. Ghosh, A. Jain, A. Marone, J. Muratore, B. Parker, A. Prodell, P. Thompson, and K. C. Wu</i>	305
Test Results for Prototypes of the Twin Aperture Dipoles for the LHC Insertion Region	<i>J. Muratore, M. Anerella, J. Cozzolino, G. Ganetis, A. Ghosh, R. Gupta, M. Harrison, A. Jain, A. Marone, S. Plate, J. Schmalzle, R. Thomas, P. Wanderer, E. Willen, and K. C. Wu</i>	309
Design Studies on Superconducting $\cos\theta$ Magnets for a Fast Pulsed Synchrotron	<i>M. N. Wilson, G. Moritz, M. Anerella, G. Ganetis, A. K. Ghosh, W. V. Hassenzahl, A. Jain, P. Joshi, J. Kaugerts, C. Muehle, J. Muratore, R. Thomas, G. Walter, and P. Wanderer</i>	313
Precision Septum-Like Dipole Magnet for the HERA Luminosity Upgrade	<i>B. Anderberg, J. Danielsson, W. Beeckman, Y. Holler, K. Sinram, M. Vieweg, F. Willeke, and G. Woebke</i>	317
Magnet System for HIRFL-CSR Project	<i>P. Yuan, Y. He, B. Zhang, L. Z. Ma, R. R. He, S. F. Han, W. J. Liu, H. Xiong, Y. Wang, J. W. Xia, W. L. Zhan, and B. W. Wei</i>	321
Magnet Prototypes for CSRm Injection Beam Line	<i>P. Yuan, W. J. Liu, H. Xiong, Y. He, B. Zhang, L. Z. Ma, S. F. Han, R. R. He, Y. Wang, M. T. Song, J. W. Xia, and W. L. Zhan</i>	325
A Superferric Quadrupole for Use in an SRF Cryomodule	<i>A. F. Zeller, J. C. DeKamp, A. Facco, T. L. Grimm, J. Kim, and R. Zink</i>	329
Development and Test of Single-Bore $\cos\theta$ Nb ₃ Sn Dipole Models with Cold Iron Yoke	<i>N. Andreev, G. Ambrosio, E. Barzi, R. Carcagno, D. R. Chichili, J. DiMarco, S. Feher, L. Imbasciati, V. V. Kashikhin, M. Lamm, P. J. Limon, D. Orris, P. Schlabach, C. Sylvester, M. Tartaglia, I. Terechkine, J. C. Tompkins, S. Yadav, R. Yamada, and A. V. Zlobin</i>	332
Detector Magnets		
The Superconducting Solenoid for the KEDR Detector	<i>V. V. Anashin, L. M. Barkov, A. K. Barladyan, G. A. Blinio, S. V. Karpov, G. M. Kolachev, V. F. Kulikov, S. G. Pivovarov, V. I. Plyusnin, Y. I. Oschepkov, A. A. Ruban, V. P. Smakhtin, and Y. A. Tikhonov</i>	337
Final Design of a Compact Sweeper Magnet for Nuclear Physics	<i>J. Toth, M. D. Bird, J. R. Miller, S. Prestemon, J. C. DeKamp, L. Morris, M. Thoennessen, and A. Zeller</i>	341
The CMS Conductor	<i>B. Blau, D. Campi, B. Curé, R. Folch, A. Hervé, I. L. Horvath, F. Kircher, R. Musenich, J. Neuenschwander, P. Riboni, B. Seeber, S. Tavares, S. Sgobba, and R. P. Smith</i>	345
The Superconducting Magnet System of AMS-02—A Particle Physics Detector to be Operated on the International Space Station	<i>B. Blau, S. M. Harrison, H. Hofer, I. L. Horvath, S. R. Milward, J. S. H. Ross, S. C. C. Ting, J. Ulbricht, and G. Viertel</i>	349
Design Study of the Superconducting Magnet for a Large Acceptance Spectrometer	<i>A. Dael, B. Gastineau, J. E. Ducret, and V. S. Vysotsky</i>	353
The Winding Line for the CMS Reinforced Conductor	<i>P. Fabbriatore, D. Campi, C. D'Urzo, S. Farinon, A. Gaddi, B. Levesy, L. Loche, R. Musenich, F. Rondeaux, R. Penco, and N. Valle</i>	358
CMS Coil Thermal Shields Final Design	<i>Ph. Fazilleau, Ph. Bredy, and B. Levesy</i>	362
Status of the LHCb Magnet System	<i>J. André, P. Charra, W. Flegel, P. A. Giudici, O. Jamet, P. Lançon, M. Losasso, F. Rohner, and C. Rosset</i>	366
Continuous EB Welding of the Reinforcement of the CMS Conductor	<i>R. Folch, B. Blau, D. Campi, R. Christin, J. P. Créton, B. Curé, A. Hervé, I. L. Horvath, J. Neuenschwander, P. Riboni, S. Sequeira Tavares, and S. Sgobba</i>	372
Mechanical Behavior of the ATLAS B0 Model Coil	<i>A. Foussat, N. Dolgetta, E. Acerbi, F. Alessandria, R. Berthier, F. Broggi, A. Dael, A. Dudarev, C. Mayri, P. Miele, M. Reytiér, L. Rossi, M. Sorbi, Z. Sun, H. H. J. Ten Kate, I. Vanenkov, and G. Volpini</i>	376
Critical Current Measurements on the CMS Stabilized Conductor	<i>M. Greco, P. Fabbriatore, and R. Musenich</i>	381
Status of the CMS Magnet (MT17)	<i>A. Hervé, G. Acquistapace, D. Campi, P. Cannarsa, P. Fabbriatore, F. Feyzi, H. Gerwig, J. P. Grillet, I. L. Horvath, V. Kaftanov, F. Kircher, R. Loveless, J. M. Maugain, G. Perinic, H. Rykaczewski, E. Sbrissa, R. P. Smith, and L. Veillet</i>	385
Design and Test of a 1-MJ SMES System	<i>K. C. Seong, H. J. Kim, S. W. Kim, J. W. Cho, Y. K. Kwon, S. R. Hahn, H. J. Jeon, and I. K. Yu</i>	391
CMS Coil Design and Assembly	<i>F. Kircher, P. Brédy, D. Campi, P. Fabbriatore, S. Farinon, H. Gerwig, A. Hervé, I. L. Horvath, B. Levesy, R. Musenich, Y. Pabot, A. Payn, and L. Veillet</i>	395

The Dipole Magnet Design for the ALICE DiMuon Arm Spectrometer	
. <i>P. Akishin, N. Anischenko, N. Blinov, I. Boguslavsky, D. Cacaot, V. Danilov, V. Datskov, O. Golubitsky, A. Kalimov, E. Kochournikov, A. Lyubimtsev, A. Makarov, K. Mikhailov, I. Olex, V. Popov, S. Semashko, A. Shabunov, Y. Shishov, A. Shurygin, M. Shurygina, A. Sissakian, D. Swoboda, and A. Vodopianov</i>	399
Design and Test of the Titanium Alloy Tie Rods for the CMS Coil Suspension System	
. <i>B. Levesy, H. Gerwig, F. Kircher, and M. Reytier</i>	403
Quench Protection and Safety of the ATLAS Central Solenoid	
. <i>Y. Makida, Y. Doi, T. Haruyama, H. ten Kate, M. Kawai, T. Kobayashi, T. Kondo, Y. Kondo, S. Mizumaki, G. Olesen, E. Sbrissa, A. Yamamoto, and H. Yamaoka</i>	407
ATLAS B0 Toroid Model Coil Test at CERN	
. <i>P. Miele, E. Acerbi, R. Berthier, H. Boxman, F. Broggi, F. Cataneo, A. Dael, N. Dolgetta, A. Dudarev, A. Foussat, F. Haug, H. ten Kate, C. Mayri, A. Paccalini, G. Rivoltella, L. Rossi, E. Sbrissa, H. Tyrvaenen, and G. Volpini</i>	411
Fabrication and Mechanical Performance of the ATLAS Central Solenoid	
. <i>S. Mizumaki, Y. Makida, T. Kobayashi, H. Yamaoka, Y. Kondo, M. Kawai, Y. Doi, T. Haruyama, S. Mine, H. Takano, A. Yamamoto, T. Kondo, and H. ten Kate</i>	416
Manufacturing Aspects of the ATLAS Barrel Toroid Double Pancakes	
. <i>G. Drago, G. Gaggero, P. Gagliardi, A. Laurenti, R. Marabotto, and R. Penco</i>	420
Aluminum Alloy Production for the Reinforcement of the CMS Conductor	
. <i>S. Sequeira Tavares, B. Blau, D. Campi, B. Curé, I. L. Horvath, P. Riboni, S. Sgobba, and R. P. Smith</i>	424
Design, Construction, and Quality Tests of the Large Al-Alloy Mandrels for the CMS Coil	
. <i>S. Sgobba, C. D'Urzo, P. Fabbriatore, S. Farinon, A. Gaddi, A. Lauro, B. Levesy, L. Loche, R. Musenich, F. Rondeaux, S. Sequeira Tavares, and N. Valle</i>	428
Status of the ALICE Magnet System	
. <i>D. Swoboda, L. Leistam, L. Pigni, D. Cacaot, E. Kochournikov, and A. Vodopianov</i>	432
A Thin Superconducting Solenoid Magnet for Particle Astrophysics	
. <i>A. Yamamoto, Y. Makida, H. Yamaoka, H. Ohmiya, K. Tanaka, T. Haruyama, T. Yoshida, K. Yoshimura, S. Matsuda, K. Kikuchi, Y. Ootani, and S. Mizumaki</i>	438
High Field Solenoids	
Design, Manufacturing, and Testing of a Nb ₃ Sn Coil Employing Ti Alloy as Structural Material	
. <i>C. A. Baldan, C. Y. Shigue, D. G. Pinatti, and E. Ruppert-Filho</i>	443
Low Resolution NMR Magnets in the 23 to 35 T Range at the NHMFL	
. <i>M. D. Bird and Z. Gan</i>	447
End Effects in the NHMFL 45 T Hybrid Resistive Insert	
. <i>I. R. Dixon, M. D. Bird, and S. Bole</i>	452
Superconducting High Field Solenoids for Hybrid Systems	
. <i>A. B. Oliva</i>	456
Electrical Joints in the CMS Superconducting Magnet	
. <i>S. Farinon, P. Chesny, B. Curé, P. Fabbriatore, M. Greco, and R. Musenich</i>	462
Conceptual Design of High Transverse Field Magnets at the NHMFL	
. <i>A. V. Gavrilin, M. D. Bird, S. T. Bole, and Y. M. Eyssa</i>	465
Superconducting Inserts in High-Field Solenoids	
. <i>T. Kiyoshi, S. Matsumoto, M. Kosuge, M. Yuyama, H. Nagai, F. Matsumoto, and H. Wada</i>	470
Persistent-Mode Operation of a Cryocooler-Cooled HTS Magnet	
. <i>K. Koyanagi, S. Matsumoto, K. Fukushima, T. Kiyoshi, and H. Wada</i>	476
The U. S. NHMFL 60 T Long Pulse Magnet Failure	
. <i>J. R. Sims, J. B. Schillig, G. S. Boebinger, H. Coe, A. W. Paris, M. J. Gordon, M. D. Pacheco, T. G. Abeln, R. G. Hoagland, M. C. Mataya, K. Han, and A. Ishmaku</i>	480
Compact High Field Superconducting Coil	
. <i>V. E. Keilin, S. M. Miklyaev, M. I. Surin, and S. A. Shevchenko</i>	484
Conceptual Design of Pion-Capture Magnets of up to 15 cm Bore and 20 T Peak Field	
. <i>R. J. Weggel</i>	487
Fusion Magnets	
Engineering Design Status of the KSTAR TF Coil Structure	
. <i>H. J. Ahn, Y. W. Lee, T. H. Kwon, S. C. Lee, C. H. Choi, Y. K. Oh, D. K. Lee, J. S. Lee, D. S. Kim, and C. D. Hong</i>	492
Pulsed Operation Test Results of the ITER-CS Model Coil and CS Insert	
. <i>T. Ando, T. Isono, T. Kato, N. Koizumi, K. Okuno, K. Matsui, N. Martovetsky, Y. Nunoya, M. Ricci, Y. Takahashi, and H. Tsuji</i>	496
Design of Superconducting Coil System for Remodeling JT-60	
. <i>T. Ando, S. Ishida, T. Kato, M. Kikuchi, K. Kizu, M. Matsukawa, Y. M. Miura, H. Nakajima, A. Sakasai, and K. Tsuchiya</i>	500
Acoustic Emission During DC Operations of the ITER Central Solenoid Model Coil	
. <i>K. Arai, A. Ninomiya, T. Ishigohka, K. Takano, K. Matsui, P. C. Michael, R. F. Vieira, N. N. Martovetsky, K. Kaiho, H. Nakajima, Y. Takahashi, T. Kato, T. Ando, H. Tsuji, and K. Okuno</i>	504
The Comparison of Active and Passive Cancellation Coils for SSTF	
. <i>S. Baang, S. Baek, Y. Chu, K. Kim, M. Kim, Y. Kim, Y. Lee, Q. Wang, D. P. Ivanov, V. E. Keilin, S. M. Miklyaev, I. O. Shchegolev, and M. I. Surin</i>	508

Transient Stability Results for Nb ₃ Sn Cable-in-Conduit Conductors . . .	<i>P. Bruzzone, A. Fuchs, B. Stepanov, and G. Vecsey</i>	512
Performance Evolution of Nb ₃ Sn Cable-in-Conduit Conductors Under Cyclic Load	<i>P. Bruzzone, A. M. Fuchs, B. Stepanov, and G. Vecsey</i>	516
Upgrade of Operating Range for SULTAN Test Facility	<i>P. Bruzzone, A. Anghel, A. Fuchs, G. Pasztor, B. Stepanov, M. Vogel, and G. Vecsey</i>	520
Coupling Currents Loss in Nb ₃ Sn Cable-in-Conduit Conductors	<i>P. Bruzzone</i>	524
Magnetic Fusion Devices—Status and Prospects	<i>M. Chatelier</i>	528
Electromagnetic Loads on the KSTAR Magnet System	<i>C. H. Choi, D. K. Lee, J. W. Sa, H. J. Ahn, Y. K. Oh, K.-I. You, J. Y. Kim, and S. Cho</i>	534
Electrical and Thermal Designs and Analyses of Joints for the ITER PF Coils	<i>D. Ciazynski and A. Martinez</i>	538
Resistances of Electrical Joints in the TF Model Coil of ITER: Comparisons of First Test Results with Samples Results	<i>D. Ciazynski, M. Ricci, J. L. Duchateau, V. Marchese, A. Ulbricht, F. Wuechner, G. Zahn, H. Fillunger, and R. Maix</i>	543
ITER TF Conductor Insert Coil Manufacture	<i>N. Cheverev, V. Glukhikh, O. Filatov, V. Belykov, V. Muratov, S. Egorov, I. Rodin, A. Malkov, M. Sukhanova, S. Gavrilov, V. Krylov, B. Mudugin, N. Bondarchouk, V. Yakubovsky, A. Cherdakov, M. Mikhailov, Yu. Konstantinov, Yu. Sokolov, G. Yakovleva, S. Peregodov, P. Chaika, V. Sytnikov, A. Rychagov, A. Taran, A. Shikov, V. Pantcyrny, A. Vorobieva, E. Dergunova, I. Abdukhonov, K. Mareev, and N. Grysnov</i>	548
High Voltage Tests of the ITER Toroidal Field Model Coil Insulation System	<i>S. Fink, A. Ulbricht, H. Fillunger, A. Bourquard, and M. Prevot</i>	554
Superconducting Coil System for a Stellarator Fusion Reactor	<i>E. Harmeyer, J. Kifflinger, A. Wieczorek, and H. Wobig</i>	558
Heat Deposition in the ITER FEAT Poloidal Field Coils During a Plasma Scenario	<i>P. Hertout, D. Bessette, A. Bleyer, J. L. Duchateau, and S. Nicollet</i>	562
Results of the Model Coil Tests for the Cable-in-Conduit Conductor for SST-1 Tokamak	<i>O. P. Anashkin, D. P. Ivanov, V. E. Keilin, N. Ph. Kopeikin, I. A. Kovalev, A. V. Krivykh, S. L. Kruglov, V. V. Lysenko, S. I. Novikov, V. M. Patrikeev, S. Pradhan, Y. C. Saxena, V. I. Scherbakov, I. O. Shugaev, and V. V. Stepanov</i>	567
Current Feeder System for the KSTAR Device	<i>Y. S. Kim, Y. M. Park, K. Kim, Y. K. Oh, C. H. Choi, J. W. Sa, N. I. Her, and G. S. Lee</i>	571
Development of High Cu Ratio Nb ₃ Al and Nb ₃ Sn CICC for Superconducting Toroidal Field Coils of JT-60	<i>K. Kizu, Y. M. Miura, K. Tsuchiya, K. Matsui, T. Isono, A. Sakasai, M. Matsukawa, S. Ishida, and T. Ando</i>	575
Adiabatical Spherical Tokamak (TSP-AST) Magnets	<i>A. V. Korotkov, A. Alekseev, D. Garkusha, V. Krylov, E. Lamzin, A. Malkov, A. Mineev, B. E. Azizov, V. Dokouka, and R. Khayrutdinov</i>	579
Fabrication of Cables for the Background-Field Magnet System of SSTF	<i>S. Lee, B. Lim, S. Baang, M. Kim, H. Park, J. Kim, I. Han, B. Lee, and K. Kim</i>	583
Mechanical Design and Analysis of Joints for the ITER PF Coils	<i>P. Libeyre and P. Decool</i>	586
Fabrication of the KSTAR Superconducting CICC	<i>B. S. Lim, S. I. Lee, K. M. Kim, and J. Y. Choi</i>	591
Assembly in the Test Facility, Acceptance and First Test Results of the ITER TF Model Coil	<i>H. Fillunger, F. Hurd, R. K. Maix, E. Salpietro, D. Ciazynski, J.-L. Duchateau, P. Libeyre, A. Martinez, E. Bobrov, W. Herz, V. Marchese, M. Süßer, A. Ulbricht, F. Wüchner, G. Zahn, A. della Corte, M. Ricci, E. Theisen, G. Kraft, A. Bourquard, F. Beaudet, B. Schellong, R. Zanino, and L. Savoldi</i>	595
Test of the ITER Central Solenoid Model Coil and CS Insert	<i>N. Martovetsky, P. Michael, J. Minervini, A. Radovinsky, M. Takayasu, C. Y. Gung, R. Thome, T. Ando, T. Isono, K. Hamada, T. Kato, K. Kawano, N. Koizumi, K. Matsui, H. Nakajima, G. Nishijima, Y. Nunoya, M. Sugimoto, Y. Takahashi, H. Tsuji, D. Bessette, K. Okuno, N. Mitchell, M. Ricci, R. Zanino, L. Savoldi, K. Arai, and A. Ninomiya</i>	600
Application of High Temperature Superconductor in National Institute for Fusion Science	<i>T. Mito, H. Chikaraishi, S. Hamaguchi, R. Heller, S. Imagawa, K. Ishibashi, M. Iwakuma, A. Iwamoto, K. Maehata, R. Maekawa, J. Morikawa, O. Motojima, A. Nishimura, Y. Ogawa, T. Satow, T. Shintomi, K. Tachikawa, K. Takahata, H. Tamura, S. Yamada, Y. Yamada, and N. Yanagi</i>	606
Development of Nb ₃ Sn and NbTi CIC Conductors for Superconducting Poloidal Field Coils of JT-60	<i>Y. M. Miura, K. Kizu, K. Tsuchiya, T. Isono, K. Matsui, A. Sakasai, S. Ishida, M. Matsukawa, and T. Ando</i>	611
Engineering Design Status of the KSTAR Central Solenoid Structure	<i>Y. K. Oh, C. H. Choi, J. W. Sa, K.-I. You, D. K. Lee, M. Kwon, G. S. Lee, H. J. Ahn, T. H. Kwon, J. S. Lee, Y. W. Lee, S. C. Lee, and C. D. Hong</i>	615
Detailed Evaluation of Insulation Stresses in the KSTAR Central Solenoid	<i>J. W. Sa, C. H. Choi, Y. K. Oh, N. I. Her, S. Cho, M. Kwon, G. S. Lee, and J. H. Kim</i>	619
A Toroidal Field Model Coil for the ITER-FEAT Project	<i>E. Salpietro</i>	623
Performance of the LHD Magnet System	<i>T. Satow and O. Motojima</i>	629

First Measurement of the Current Sharing Temperature at 80 kA in the ITER Toroidal Field Model Coil (TFMC)	635
. <i>L. Savoldi, R. Zanino, V. Marchese, N. Martovetsky, M. Suesser, A. Ulbricht, F. Wuechner, and G. Zahn</i>	
Overview of a New Test Facility for the W7X Coils Acceptance Tests	639
. <i>T. Schild, D. Bouziat, Ph. Bredy, G. Dispau, A. Donati, Ph. Fazilleau, L. Genini, M. Jacquemet, B. Levesy, F. Molinié, J. Sapper, C. Walter, M. Wanner, and L. Wegener</i>	
Optimization of Helical Hybrid Coil for High Field Tokamak	644
. <i>H. Tsutsui, K. Nakayama, S. Nomura, R. Shimada, and S. Tsuji-Iio</i>	
Operating Temperature Margin and Heat Load in PF Superconducting Coils of KSTAR	648
. <i>Q. Wang, C. S. Yoon, J. He, W. Chung, and K. Kim</i>	
Status of the Construction of the W7-X Magnet System	653
. <i>L. Wegener, W. Gardebrecht, R. Holzthüm, N. Jaksic, F. Kerl, J. Sapper, and M. Wanner</i>	
Progress of HT-7U Superconducting Magnets	659
. <i>W. Peide</i>	
Analysis on the Cryogenic Stability and Mechanical Properties of the LHD Helical Coils	662
. <i>N. Yanagi, S. Imagawa, T. Mito, A. V. Gavrillin, S. Hamaguchi, H. Sekiguchi, H. Chikaraishi, A. Iwamoto, A. Nishimura, Y. Nakamura, T. Satow, and O. Motojima</i>	
Status of the Floating Coil of the Levitated Dipole Experiment	666
. <i>A. Zhukovsky, D. Garnier, C. Gung, J. Kesner, M. Mauel, P. Michael, J. Minervini, M. Morgan, T. S. Pedersen, A. Radovinsky, J. Schultz, and B. Smith</i>	
High Field Magnet Facilities	
A Large Cryogen Free Iron Shielded 6.5 Tesla Magnet for Nuclear Beam Experiments	670
. <i>J. Good, R. Mitchell, and R. Hall</i>	
The Grenoble High Magnetic Field Laboratory as a USER FACILITY	674
. <i>F. Debray, H. Jongbloets, W. Joss, G. Martinez, E. Mossang, P. Petmezakis, J. C. Picoche, A. Plante, P. Rub, P. Sala, and P. Wyder</i>	
Construction of the Cryogen-Free 23 T Hybrid Magnet	678
. <i>K. Watanabe, S. Awaji, K. Takahashi, G. Nishijima, M. Motokawa, Y. Sasaki, Y. Ishikawa, K. Jikihara, and J. Sakuraba</i>	
Wigglers and Undulators	
A Superconducting Undulator for 3rd-Generation Light Sources	682
. <i>S. Caspi, S. A. Gourlay, R. Hafalia, R. L. Hinkins, A. F. Lietzke, J. O'Neill, and G. L. Sabbi</i>	
Design and Construction Performance of a Compact Cryogen-Free Superconducting Wavelength Shifter	686
. <i>C. S. Hwang, B. Wang, R. Wahrer, H. H. Chen, C. H. Chang, F. Y. Lin, T. C. Fan, and C. T. Chen</i>	
R&D for a Minigap Undulator at LURE	691
. <i>O. Marcouillé, J.-C. Boyer, M. Corlier, S. Denise, J.-P. Duval, C. Herbeaux, E. Labrude, D. Lefèbvre, J.-L. Marlats, P. Rommeluère, M. Vandenberghe, and J. Vétéran</i>	
Pulsed Magnets	
The U.S. NHMFL 100 Tesla Multi-Shot Magnet	695
. <i>J. L. Bacon, C. N. Ammerman, H. Coe, G. W. Ellis, B. L. Lesch, J. R. Sims, J. B. Schillig, and C. A. Swenson</i>	
Strong Pulsed Magnetic Quadrupole Lens	699
. <i>V. Chichkine, M. Winkler, K. H. Behr, H. Geissel, A. Kalimov, G. Li, G. Muenzenberg, C. Scheidenberger, H. Weick, and H. Wollnik</i>	
Quasi-Stationary Magnetic Fields of 60 T Using Inductive Energy Storage	703
. <i>G. Aubert, L. van Bockstal, E. Fernandez, W. Joss, V. Kuchinski, R. Kurtz, N. Mikhailov, and Ph. Sala</i>	
Magnet and Wire Technology at the K.U.Leuven Pulsed Field Laboratory	707
. <i>K. Rosseel, A. Lagutin, F. Herlach, W. Boon, Y. Bruynseraede, and J. Van Humbeeck</i>	
NMR	
Persistent-Mode Operation of a 920 MHz High-Resolution NMR Magnet	711
. <i>T. Kiyoshi, A. Sato, T. Takeuchi, K. Itoh, S. Matsumoto, O. Ozaki, K. Fukushima, H. Wada, M. Yoshikawa, T. Kamikado, S. Ito, T. Miki, T. Hase, M. Hamada, S. Hayashi, Y. Kawate, and R. Hirose</i>	
Development of 1 GHz Class NMR Magnets	715
. <i>H. Wada and T. Kiyoshi</i>	
Others	
Design of a 7.5 T Superconducting Quadrupole Magnet for Magnetic Circular Dichroism Experiments	718
. <i>C. H. Chang, F. Z. Hsiao, C. S. Hwang, M. H. Huang, and C. T. Chen</i>	
Design of High Temperature Superconducting Magnet	721
. <i>Y. S. Jo, Y. K. Kwon, Y. K. Kim, and J. P. Hong</i>	
Progress in the Design and Operation of High-T _c Coils Using Dip-Coat BSCCO-2212/Ag Tape	725
. <i>M. S. Newson, D. T. Ryan, M. N. Wilson, and H. Jones</i>	
Development of a Superconducting Magnet Excited with Thermoelectric Conversion Element for Quasi Persistent Mode	729
. <i>M. Ono and T. Kuriyama</i>

. *C. Lee, H. M. Kim, H. Kang, T. J. Kim, T. K. Ko, E. R. Lee, S. Lee, and K. Y. Yoon* 846
Test of DC Reactor Type Fault Current Limiter Using SMES Magnet for Optimal Design.
. *E. R. Lee, S. Lee, C. Lee, H.-J. Suh, D. K. Bae, H. M. Kim, Y.-S. Yoon, and T. K. Ko* 850

The Short Circuit Analysis of Integrated Three Phase Superconducting Fault Current Limiter with Two Phase Superconducting Circuits	<i>S. Lee, E. R. Lee, C. Lee, S.-J. Choi, and T. K. Ko</i>	854
Magnetic Circuit Switching Element with Superconducting Coil	<i>H. Mizutori, A. Ninomiya, and T. Ishigohka</i>	859
Fabrication and Test of a Superconducting Generator with Ring Windings	<i>Y. Nomoto, A. Ninomiya, and T. Ishigohka</i>	863
An Experimental Study on a Fast Self-Acting Magnetic Shield Type Superconducting Fault Current Limiter	<i>T. Onishi, M. Kawasumi, K.-i. Sasaki, and R. Akimoto</i>	868
Preliminary Experiments on Saturated DC Reactor Type Fault Current Limiter	<i>K. M. Salim, T. Hoshino, M. Nishikawa, I. Muta, and T. Nakamura</i>	872
Proposal of Flux Flow Resistance Type Fault Current Limiter Using Bi2223 High T_c Superconducting Bulk	<i>H. Shimizu, Y. Yokomizu, T. Matsumura, and N. Murayama</i>	876
Recovery Process of a Transformer Type Superconducting Fault Current Limiter	<i>Y. Shirai, K. Fujikawa, M. Shiotsu, H. Hatta, S. Muroya, and T. Nitta</i>	880
A Proposal of New Operating Procedure of Transformer Type Fault Current Limiter	<i>Y. Shirai, M. Taguchi, M. Shiotsu, H. Hatta, S. Muroya, and T. Nitta</i>	885
Experimental Study on System Stability Evaluation in Parallel Running of a Superconducting Generator and a SMES	<i>Y. Shirai, T. Nitta, and M. Yamada</i>	890
Dynamic Simulation and Tests of a Three-Phase High T_c Superconducting Fault Current Limiter	<i>J. Zhang, Z. Gao, N. Song, H. Wen, L. Xiao, L. Lin, and Z. Zuo</i>	896
Application Studies of Superconducting Fault Current Limiters in Electric Power Systems	<i>L. Ye, L. Z. Lin, and K.-P. Juengst</i>	900
End-Winding Region Configuration of an HTS Transformer	<i>F. Zizek, Z. Jelinek, Z. Timoransky, H. Piel, F. Chovanec, P. Mozola, and M. Polak</i>	904
Levitation, Propulsion, and Guidance		
A New Type of Active-Maglev System Using YBCO Bulk and Multiple Electromagnets	<i>H. Hayashi, H. Ueda, M. Tsuda, and A. Ishiyama</i>	907
Static and Dynamic Characteristics in Levitating X - Y Transporter Using HTS Bulks	<i>Y. Teranishi, H. Ueda, M. Tsuda, and A. Ishiyama</i>	911
MAGLEV Projects Technology Aspects and Choices	<i>A. Cassat and M. Jufer</i>	915
Fabrication and Flux-Trapping Experiments of a 198 mm \times 99 mm Bulk magnet Using YBCO Superconductors	<i>H. Kamijo and H. Fujimoto</i>	926
A Null-Current Electro-Dynamic Levitation System	<i>R. Kratz and R. F. Post</i>	930
Development of Compact Magnet for High Magnetic Force	<i>K. Miyoshi, H. Shimizu, S.-i. Meguro, H. Uetake, N. Hirota, and K. Kitazawa</i>	933
Precise Positioning Using Electrostatic Glass Motor with Diamagnetically Suspended Rotor	<i>R. Moser and H. Bleuler</i>	937
Development of Superconducting Magnets for Uniform and High Magnetic Force Field Generation	<i>O. Ozaki, K. Koyanagi, T. Kiyoshi, S. Matsumoto, J.-i. Fujihira, and H. Wada</i>	940
Progress of High-Speed Maglev in China	<i>Y. Luguang</i>	944
Engineering Research and Development of Magnetically Levitated High-Temperature Superconducting Coil System for Mini-RT Project	<i>N. Yanagi, J. Morikawa, T. Mito, Y. Ogawa, S. Hamaguchi, H. Chikaraishi, M. Iwakuma, T. Uede, I. Itoh, S. Nose, and S. Fukui</i>	948
Magnetic Separation		
Removal of Arsenic From Geothermal Water by High Gradient Magnetic Separation	<i>A. Chiba, H. Okada, T. Tada, H. Kudo, H. Nakazawa, K. Mitsuhashi, T. Ohara, and H. Wada</i>	952
Magnetic System of the Installation for Plasma Separation Process	<i>I. N. Churkin, V. V. Demenev, E. S. Rouvinski, E. P. Semenov, A. G. Steshov, and V. I. Volosov</i>	955
Study on Open Gradient Magnetic Separation Using Multiple Magnetic Field Sources	<i>S. Fukui, H. Nakajima, A. Ozone, M. Hayatsu, M. Yamaguchi, T. Sato, H. Imaizumi, S. Nishijima, and T. Watanabe</i>	959
A Novel High-Gradient Magnetic Separator (HGMS) Design for Biotech Applications	<i>C. Hoffmann, M. Franzreb, and W. H. Höll</i>	963
High Gradient Magnetic Separation for Weakly Magnetized Fine Particles	<i>H. Okada, T. Tada, A. Chiba, K. Mitsuhashi, T. Ohara, and H. Wada</i>	967
Design and Fabrication of an HTS Reciprocating Magnetic Separator	<i>C. M. Rey, W. C. Hoffman, Jr., K. Cantrell, Y. M. Eyssa, S. W. VanSciver, D. Richards, and J. Boehm</i>	971

Permanent Magnet Applications

The Use of a Permanent Magnet for Water Content Measurements of Wood Chips	975
. <i>P. J. Barale, C. G. Fong, M. A. Green, P. A. Luft, A. D. McInturff, J. A. Reimer, and M. Yahnke</i>	

Others

Characteristics of the Magnetic Gear Using a Bulk High-Tc Superconductor	979
. <i>M. Okano, K. Tsurumoto, S. Togo, N. Tamada, and S. Fuchino</i>	
Testing of a Cryocooler-Cooled HTS Magnet with Silver-Sheathed Bi2223 Tapes for Silicon Single-Crystal Growth Applications	984
. <i>M. Ono, K. Tasaki, Y. Ohotani, T. Kuriyama, Y. Sumiyoshi, S. Nomura, M. Kyoto, T. Shimonosono, S. Hanai, M. Shoujyu, N. Ayai, T. Kaneko, S. Kobayashi, K. Hayashi, H. Takei, K. Sato, T. Mizuishi, M. Kimura, and T. Masui</i>	
A Superconducting Magnet for a Beam Delivery System for Carbon Ion Cancer Therapy	988
. <i>C. Priano, P. Fabbriatore, S. Farinon, R. Musenich, M. Perrella, and S. Squarcia</i>	
Design and Fabrication of an HTS Magnet for the VASIMR Experiment	993
. <i>C. M. Rey, W. C. Hoffman, Jr., F. R. Chang-Diaz, A. V. Ilin, A. J. Petro, D. S. Winter, H. Mukai, and S. W. Schwenterly</i>	
Influence of High Magnetic Field on the Corrosion of Carbon Steel	997
. <i>A. Sato, H. Ogiwara, T. Miwa, and S. Nakabayashi</i>	

Low Tc Superconductors

Quench Propagation and Stability of Nb ₃ Al Superconductors Made by Rapid Heating, Quenching, and Transformation Process	1001
. <i>N. Amemiya, N. Hoshi, N. Banno, T. Takeuchi, and H. Wada</i>	
TRUQ (TRansformation-Heat Based Up-Quenching) for High-Performance Nb ₃ Al Superconductors	1005
. <i>N. Banno, K. Fukushima, T. Takeuchi, T. Fukuzaki, and H. Wada</i>	
Superconductor and Cable R&D for High Field Accelerator Magnets at Fermilab.	1009
. <i>E. Barzi, G. Ambrosio, N. Andreev, P. Bauer, D. Chichili, M. Fratini, L. Elementi, J. Hoffman, P. J. Limon, S. Mattafirri, J.-M. Rey, R. Yamada, and A. V. Zlobin</i>	
The Superconducting Strand for the CMS Solenoid Conductor	1014
. <i>B. Curé, B. Blau, D. Campi, L. F. Goodrich, I. L. Horvath, F. Kircher, R. Liikamaa, J. Seppälä, R. P. Smith, J. Teuho, and L. Vieillard</i>	
Beam-Livingston Barrier and Dynamics of the Magnetic Flux Flow in Layered (Plated) Superconductors	1018
. <i>A. A. Bush, G. L. Dorofeev, V. M. Drobin, Yu. D. Kuroedov, N. M. Vladumirova, and V. S. Vyatkin</i>	
Direct Observation of the Magnetic Flux Tuning to the Pinning Structure in NbTi	1022
. <i>G. L. Dorofeev, Yu. D. Kuroedov, and V. S. Vyatkin</i>	
Stress and Strain Effects of Nb ₃ Al Conductors Subjected to Different Heat Treatments.	1025
. <i>T. Fukuzaki, T. Takeuchi, N. Banno, N. Tatsumi, K. Itoh, H. Ogiwara, and H. Wada</i>	
Toward an Accurate Scaling Relation for the Critical Current in Niobium-Tin Conductors	1029
. <i>A. Godeke, B. Ten Haken, and H. H. J. Ten Kate</i>	
Influence of Rapid Heating Condition on Superconducting Properties in Transformed Jelly-Roll Nb ₃ Al Multifilamentary Wire	1033
. <i>N. Harada, T. Nakano, M. Tsuda, T. Hamajima, F. Buta, E. Lee, M. D. Sumption, E. W. Collings, K. Tagawa, H. Moriai, T. Takeuchi, H. Wada, and K. Watanabe</i>	
Production of a 11 km Long Jelly Roll Processed Nb ₃ Al Strand with High Copper Ratio of 4 for Fusion Magnets	1037
. <i>F. Hosono, G. Iwaki, K. Kikuchi, S. Ishida, T. Ando, K. Kizu, Y. Miura, and A. Sakasai</i>	
Improvements in High Field Properties of RHQT-Processed Nb ₃ Al Wire	1041
. <i>K. Inoue, Y. Iijima, and A. Kikuchi</i>	
Development of Bronze-Processed Nb ₃ Sn Superconducting Wires for High Field Magnets.	1045
. <i>G. Iwaki, J. Sato, S. Inaba, and K. Kikuchi</i>	
Optimized Heat Treatment of Internal Tin Nb ₃ Sn Strands	1049
. <i>H. Fillunger, M. Foitl, K. Hense, I. Kajgana, A. Kasztler, H. Kirchmayr, R. Lackner, J. Leoni, R. Maix, and M. Müller</i>	
Measurements of Interstrand Thermal and Electrical Conductance in Multistrand Superconducting Cables.	1052
. <i>Y. Lei, Y. Yu, Y. Dai, and H. Nan</i>	
Status of the LHC Superconducting Cable Mass Production	1056
. <i>J. D. Adam, T. Boutboul, G. Cavallari, Z. Charifoulline, C.-H. Denarie, S. Le Naour, D. F. Leroy, L. R. Oberli, D. Richter, A. P. Verweij, and R. Wolf</i>	
Bronze Tin Content and Grain Size in Nb ₃ Sn Composite Superconductors	1063
. <i>W. D. Markiewicz and R. E. Goddard</i>	
(Nb,Ti) ₃ Sn Superconducting Wire with CuNb Reinforcing Stabilizer	1067
. <i>H. Sakamoto, S. Endoh, Y. Nagasu, K. Wada, A. Kimura, S.-i. Meguro, S. Awaji, K. Watanabe, and M. Motokawa</i>	
The Experimental Investigation of the Nb ₃ Sn Strands Superconducting Properties Defining the Stability of Magnet Systems.	1071
. <i>A. Shikov, V. Panyrnyi, N. Kozlenkova, A. Vorobieva, K. Mareev, E. Dergunova, and O. Malafeeva</i>	
Manufacturing of Superconducting Cable for the LHC—Key Technology and Statistical Analysis.	1075
. <i>T. Shimada, M. Sugimoto, Y. Nagasu, A. Takagi, K. Wada, H. Shimizu, A. Kimura, and S.-i. Meguro</i>	

High Transport Critical Currents in Dense Monofilamentary Fe- and Ni-Clad MgB ₂ Tapes and MgB ₂ /Fe Wires with 7 Filaments.	<i>H. L. Suo, C. Beneduce, M. Dhallé, P. Toulemonde, and R. Flükiger</i>	1079
Grease Impregnation Effect in Measurement of Critical Current for NbTi Superconductors	<i>N Sekine, T. Takao, Y. Kojo, M. Neya, Y. Kubo, R. Ogawa, S. Fukui, and O. Tsukamoto</i>	1084
Nb ₃ Al Superconductors	<i>T. Takeuchi</i>	1088
Fabrication of Jelly-Roll Nb ₃ Al Superconductors by Using Al-Alloy Sheets	<i>N. Tatsumi, T. Fukuzaki, N. Banno, T. Takeuchi, H. Wada, K. Tagawa, and G. Iwaki</i>	1094
Comparative Study of NbTi Strands Developed for ITER PF Coils	<i>G. P. Vedernikov, A. K. Shikov, M. S. Novikov, S. I. Novikov, L. V. Potanina, and I. N. Gubkin</i>	1098
A.C. Energy Losses of Nb–Ti Multifilamentary Superconductors for the Magnets of the Nuclotron	<i>N. N. Agapov, G. L. Dorofeev, V. M. Drobin, A. D. Kovalenko, H. G. Khodzhbagiyan, and N. M. Vladimirova</i>	1102
The Development of ITER TF Model Coil Heat Treatment Conditions	<i>I. Abdioukhanov, V. Beliaikov, N. Cheverev, E. Dergunova, O. Filatov, S. Kouznetsov, K. Mareev, V. Pantsyrnyi, I. Rodin, A. Silaev, I. Sinitsyn, A. Shikov, V. Sytnikov, and A. Vorobieva</i>	1105
Direct Observation of Hall Voltage Inside the LHD Helical Conductor.	<i>V. S. Vysotsky, N. Yanagi, Yu. A. Ilyin, A. V. Gavrilin, M. Takeo, S. Imagawa, T. Mito, T. Satow, and H. Hayashi</i>	1109
Periodic Artificial Pinning Centers for High Critical Current Density of Tape Conductor	<i>H. Yamada, N. Harada, T. Iwamoto, K. Sugai, M. Tsuda, and T. Hamajima</i>	1113
Pinning Strength and Irreversibility Fields of Nb–Ti Multifilamentary Composites with Different Artificial Pins	<i>Y. Zhu, O. Miura, and D. Ito</i>	1117
High T_c Superconductors		
Effect of γ -Irradiation on Silver-Sheathed Bi _{1.6} Pb _{0.4} Ba ₂ Ca ₂ Cu ₃ O ₁₀ Tapes	<i>B. A. Albiss and A. R. El-Ali</i>	1121
Thermal Conductivity, Thermal Diffusivity and Thermoelectric Power of Sm-Based Bulk Superconductors	<i>H. Fujishiro and S. Kohayashi</i>	1124
Batch Testing of BSCCO 2212 Cable in Subcooled Liquid Nitrogen	<i>A. K. Ghosh, R. Gupta, W. B. Sampson, T. Hasegawa, R. M. Scanlan, and R. S. Sokolowski</i>	1128
Magnetic Properties of Fluorinated Pb-doped Hg-1223 High T _c Superconductors.	<i>N. M. Hamdan, P. V. P. S. S. Sastry, and J. Schwartz</i>	1132
HTS Conductors for Magnets	<i>T. Hasegawa, T. Koizumi, Y. Hikichi, T. Nakatsu, R. M. Scanlan, N. Hirano, and S. Nagaya</i>	1136
Effects of Strain on the Critical Current of Bi-2223/Ag Tapes	<i>H. Kitaguchi, J.-i. Nishioka, T. Hasegawa, K. Itoh, H. Kumakura, K. Togano, and H. Wada</i>	1141
Industrial High Temperature Superconductors: Perspectives and Milestones.	<i>L. J. Masur, J. Kellers, F. Li, S. Fleshler, and E. R. Podtburg</i>	1145
Local J _C and Microstructures of Multilayer Bi-2212 Composite Tape	<i>A. Matsumoto, H. Kitaguchi, B. Metz, B. ten Haken, T. Hasegawa, T. Koizumi, H. Hiroaki, K. Kumakura, and K. Togano</i>	1151
Thermal Stability of Oxide Superconductor at Various Temperatures	<i>G. Nishijima, S. Awaji, S. Murase, S. Shimamoto, and K. Watanabe</i>	1155
Studies on High Temperature Superconducting Permanent Magnet	<i>M. Qiu, S. Han, L. Z. Lin, and G. M. Zhang</i>	1159
Flux Dynamic Behavior Inside HTS Bulks Under Rotating Magnetic Field	<i>M. Qiu, L. Z. Lin, G. M. Zhang, Y. S. Wang, and L. Y. Xiao</i>	1163
Current Distribution in High-T _c Composite Tapes	<i>Y. Wang, L. Xiao, L. Lin, S. Dai, and M. Qiu</i>	1167
Homogenous Magnetic Field Generation by High-T _c Oxide Superconductors	<i>K. Yokoyama, Y. Fujine, S. Fujinuma, K. Noto, and M. Yamaguchi</i>	1171
Normal Conducting High Strength Conductors		
Properties of High Strength Cu–Nb Conductor for Pulsed Magnet Applications	<i>K. Han, V. J. Toplosky, R. Walsh, C. Swenson, B. Lesch, and V. I. Pantsyrnyi</i>	1176
Recent Progress in the Development of Ultra High Strength “Continuous” Cu/Nb and Cu/Ta Conductors for Non-Destructive Pulsed Fields Higher Than 80 T	<i>L. Thilly, F. Lecouturier, G. Coffe, and S. Askénazy</i>	1181
Investigation on the CuNb “in-situ” Microcomposites Conductivity During the Process of Tensile Testing	<i>A. Shikov, V. Pantsyrnyi, A. Nikulin, N. Kozlenkova, M. Polikarpova, and N. Khlebova</i>	1185
Status and Perspectives for Microcomposite Winding Materials for High Field Pulsed Magnets.	<i>V. I. Pantsyrnyi</i>	1189
Annealing Effects on the Electrical and Superconducting Properties of a Cu-15vol%Nb Composite Conductor.	<i>M. J. R. Sandim, C. Y. Shigue, L. G. Ribeiro, M. Filgueira, and H. R. Z. Sandim</i>	1195

Cable Manufacture

Bond and Electron Beam Welding Quality Control of the Aluminum Stabilized and Reinforced CMS Conductor by Means of Ultrasonic Phased-Array Technology	<i>J. Neuenschwander, B. Blau, I. L. Horvath, Th. Lüthi, and H. Marti</i>	1199
Manufacturing Experience for the LHC Inner Triplet Quadrupole Cables	<i>R. M. Scanlan, H. C. Higley, R. Bossert, J. Kerby, A. K. Ghosh, M. Boivin, and T. Roy</i>	1203
The Production of the Superconducting Conductor for the TFCI	<i>V. Sytnikov, N. Cheverev, S. Egorov, O. Filatov, S. Gavrilov, A. Malkov, I. Rodin, A. Rychagov, A. Shikov, V. Shpeizman, M. Suhanova, and A. Taran</i>	1207
The Development of the Welding Process for the Long Length CICC Jacket Production	<i>A. Taran, S. Egorov, A. Grigoriev, V. Mitrochin, B. Ryabichenko, and V. Sytnikov</i>	1211
Production and Qualification of 40 km of Al-Stabilized NbTi Cable for the ATLAS Experiment at CERN	<i>G. Baccaglioni, B. Blau, G. C. Cartegni, I. L. Horvath, J. Neuenschwander, D. Pedrini, L. Rossi, and G. Volpini</i>	1215

Ferromagnetic Materials

Toward the Production of 50 000 Tonnes of Low-Carbon Steel Sheet for the LHC Superconducting Dipole and Quadrupole Magnets	<i>S. Babic, S. Comel, F. Beckers, F. Brixhe, G. Peiro, and T. Verbeeck</i>	1219
--	---	------

Insulation Materials

CeO ₂ -ZrO ₂ Insulation Coatings on Ag/AgMg Sheathed Bi-2212 Superconducting Tapes by Sol-Gel Process for Magnet Technology	<i>E. Celik, Y. Akin, E. Avci, W. Sigmund, and Y. S. Hascicek</i>	1223
Development and Study of Insulation Systems for Nb ₃ Sn Accelerator Magnets	<i>N. I. Andreev, D. R. Chichili, I. M. Terechkine, and A. V. Zlobin</i>	1227
Insulation Systems for Nb ₃ Sn Accelerator Magnet Coils Manufactured by the Wind and React Technique	<i>A. Devred</i>	1232
Tests on JET TF Coil Insulation	<i>J. R. Last, J. S. Jeskins, A. S. Kaye, and V. Riccardo</i>	1238
A Voluminized Fiber-Glass Insulation for Large Superconducting Magnets	<i>R. Musenich, C. D'Urzo, P. Fabbriatore, S. Farinon, C. Priano, N. Torrani, G. Varni, and C. Zunino</i>	1242

Structural Materials

Mechanical Properties of MP35N as a Reinforcement Material for Pulsed Magnets	<i>K. Han, A. Ishmaku, Y. Xin, H. Garmestani, V. J. Toplosky, R. Walsh, C. Swenson, B. Lesch, H. Ledbetter, S. Kim, M. Hundley, and J. R. Sims, Jr.</i>	1244
Development of Non-Magnetic High Manganese Cryogenic Steel for the Construction of LHC Project's Superconducting Magnet	<i>Y. Ozaki, O. Furukimi, S. Kakihara, M. Shiraishi, N. Morito, and K. Nohara</i>	1248
Characteristics of the Austenitic Steels Used in the LHC Main Dipoles	<i>C. Lanza and D. Perini</i>	1252
First Experience in the Mass Production of Components for the LHC Dipoles	<i>P. Fessia, C. Lanza, D. Perini, and T. Verbeeck</i>	1256

Others

Development of a Copper Coating Suitable for Application on the Nonplanar W7-X Coils	<i>H. Scheller, K. Heyn, R. Nitka, A. Kramer, P. Schäfer, and E. Theisen</i>	1261
--	--	------

Instrumentation

A Device for Measuring High Current at Cryogenic Temperatures	<i>C. Berriaud and A. Donati</i>	1264
The Standard Instrumentation Feedthrough System for the LHC Cryo-Magnets	<i>D. Bozzini</i>	1269
Development of YBaCuO Bulk Superconductor for Use as Low Magnetic Field Sensor	<i>G. L. Oliveira, C. A. M. dos Santos, C. Y. Shigue, and A. J. S. Machado</i>	1272

Current Leads and the bus-bars

Current Leads for the LHC Magnet System	<i>A. Ballarino</i>	1275
Test Results of a 10 kA Current Lead Using Ag/Au Cladded Bi-2212 Tubes	<i>A. M. Fuchs, R. Wesche, A. Anghel, F. Roth, R. Heller, and M. Tasca</i>	1281
Development of High Temperature Superconductor Current Leads for 70 kA	<i>R. Heller, G. Friesinger, A. M. Fuchs, and R. Wesche</i>	1285
20.5 kA Current Leads for ATLAS Barrel Toroid Superconducting Magnets	<i>A. V. Dudarev, H. H. J. ten Kate, E. W. Boxman, V. E. Keilin, N. Ph. Kopeikin, I. A. Kovalev, A. N. Kuljamzin, V. R. Romanovskii, V. I. Shcherbakov, I. O. Shugaev, and V. V. Stepanov</i>	1289
Cryocooler Cooled HTS Current Leads for a 1 MJ/1 MW-Class SMES System	<i>M. Mariani, M. Ariante, A. Matrone, E. Petrillo, R. Quarantiello, F. Barberis, L. Martini, C. Pincella, G. Canepa, P. Ferrari, L. Ottonello, and F. Vivaldi</i>	1293
Low-Loss HTS Current Leads for Magnet Applications	<i>L. F. Martini, F. Barberis, L. Bigoni, F. Curcio, and R. Berti</i>	1297

Comparative Analysis of Design Options for Current Leads for Wendelstein 7-X Magnet System	1301
. <i>A. V. Gavrilin, J. R. Miller, F. Schauer, and S. W. Van Sciver</i>	
Design and Manufacture of the Superconducting Bus-Bars for the LHC Main Magnets.	1305
. <i>L. Belova, M. Genet, J.-L. Perinet-Marquet, P. Ivanov, and C. Uрпи</i>	
Development of a 600 A HTS Current Lead Using Modular Design	1310
. <i>H. Scheller, R. Rothfeld, F. Werfel, and M. Gehring</i>	
Current Distribution in a Reusable Junction for W7-X Coil Tests.	1313
. <i>T. Schild, J. Germain, J. B. Berton, B. Dupont, and A. Forgeas</i>	
Mechanical Properties and Reinforcement of Bi-2212 Tubular Bulk Superconductor for Current Lead	1319
. <i>H. Tamura, T. Mito, A. Iwamoto, Y. Yamada, and K. Tachikawa</i>	
8-kA HTS Current Leads for 1.9 K Test Facility at KEK.	1323
. <i>T. Bohno, Y. Yasukawa, S. Nose, M. Konno, I. Itoh, K. Tsuchiya, N. Kimura, M. Iida, T. Nakamoto, T. Ogitsu, H. Ohhata, T. Shintomi, S. Sugawara, K. Tanaka, and A. Yamamoto</i>	
Stable Long-Term Operation of Superconducting Current-Feeder System for the LHD	1328
. <i>S. Yamada, T. Mito, R. Maekawa, H. Chikaraishi, S. Moriuchi, T. Uede, H. Hiue, Y. Yasukawa, I. Itoh, T. Satow, and O. Motojima</i>	
Performance Test of Bi-2212 HTS Current Leads Prepared by the Diffusion Process	1332
. <i>Y. Yamada, O. Suzuki, M. Enomoto, K. Tachikawa, H. Tamura, A. Iwamoto, and T. Mito</i>	
Cryogenics	
First Cryogenic Testing of the ATLAS Superconducting Prototype Magnets.	1336
. <i>N. Delruelle, A. Dudarev, F. Haug, C. Mayri, J.-P. Orlic, G. Passardi, O. Pirotte, and H. ten Kate</i>	
Longitudinal Temperature Distribution in Superconducting Power Cables with Counter-Flow Cooling.	1339
. <i>S. Fuchino, M. Furuse, and N. Higuchi</i>	
Loss of Vacuum Experiments on a Superfluid Helium Vessel	1343
. <i>S. M. Harrison</i>	
Test Results of Long Term Operation of the Superfluid-Cooled Cryostat for an 1 GHz NMR Spectrometer	1347
. <i>S. Ito, T. Miki, M. Yoshikawa, M. Hamada, Y. Kawate, S. Hayashi, A. Sato, T. Kiyoshi, F. Matsumoto, H. Nagai, H. Wada, S. Fukui, and T. Noguchi</i>	
Cryocooler Assisted Cryostat for a 4 Split-Coil NbTi Magnet	1351
. <i>E. Petrillo, M. Ariante, M. Mariani, G. Masullo, A. Matrone, and R. Quarantiello</i>	
Cryogenic Systems for Large Research Projects.	1355
. <i>H. H. Quack</i>	
Improvement on Cooling Performance in He II Channel Using Fountain Effect	1359
. <i>M. Takahashi, A. Senzaki, T. Murakami, and T. Okamura</i>	
Heat Transfer on a Flat Plate at One End of a Series-Connected Rectangular Duct in Pressurized He II	1364
. <i>H. Tatsumoto, K. Hata, K. Hama, Y. Shirai, and M. Shiotsu</i>	
Numerical Simulation of Two-Phase Helium II Stratified Flow in Cryogenic Units of TESLA.	1368
. <i>Y. Xiang, S. Wolff, B. Petersen, and S. W. Van Sciver</i>	
Powering and Protection	
Estimation of Electrical Parameters of Large-Scale Superconducting Coil System for Fusion Plasma Experimental Facility	1374
. <i>H. Chikaraishi, T. Inoue, S. Takami, S. Imagawa, K. Takahata, N. Yanagi, S. Yamada, and T. Satow</i>	
Operational Loss Reduction Using Power-MOSFET for Magnetic Field Coil Power Supplies of Nuclear Fusion Experimental Machine	1378
. <i>T. Matsukawa, M. Shioyama, C. Neumeyer, S. Tsuji-Iio, and R. Shimada</i>	
Quench Protection for the Superconducting Magnet System of WENDELSTEIN 7-X.	1382
. <i>T. Rummel, O. Gaupp, G. Lochner, and J. Sapper</i>	
Single-Phase Resistive Superconductor Electrical Current Limiter.	1386
. <i>R. P. Homrich, E. R. Filho, D. G. Pinatti, C. A. Baldan, and C. Y. Shigue</i>	
Protection of Superconducting Magnets.	1390
. <i>J. H. Schultz</i>	
Active Control of Current Distribution and Stability of Superconducting Magnet by Subdividing the Conductor.	1396
. <i>K. Yamagishi, X. Q. Xie, and O. Tsukamoto</i>	
Others	
Characteristics of Surface Spark-Over Voltage for Several Waveforms on Solid Insulators in Cryogenic Coolants.	1400
. <i>M. Chiba, H. Uematsu, and T. Nitta</i>	
Electromagnetics	
Parametric Quadrilateral Meshes for the Design and Optimization of Superconducting Magnets	1404
. <i>M. Aleksa, S. Russenschuck, and C. Völlinger</i>	

Modeling a Multistrand SC Cable with an Electrical DC Lumped Network	1408
Improvement of MRI Magnet Design Through Sensitivity Analysis.	1413
The Multipoles Factory: An Element of the LHC Control	1417
Transient Behavior of Bi2223/Ag HTS Tape for Sharp Rising Current.	1422
Model of Heat Deposition During Fast Discharge Tests of the ITER Toroidal Field Model Coil.	1426
Design of an Iron Dominated Quadrupole Magnet with a High Pole-Tip Flux Density	1430
Application of Response Surface Methodology to Robust Design for Racetrack Type High Temperature Superconducting Magnet	1434
Current-Voltage Characteristics of an HTS Coil Having a Hot Spot	1438
Numerical Simulation of Superconducting Accelerator Magnets	1442
Investigation of the Transient Electrical Behavior of the ITER Central Solenoid Model Coil (CSMC) During Safety Discharge	1448
Possible Causes of the Premature Voltage Gradient of the CS Insert Coil	1453
An Optimal Design Method for SMES Coils Using HTS Tapes	1459
Eddy Currents and Their Effects on the Mechanical Structures of the Dynamic Ergodic Divertor of the TEXTOR 94 Tokamak	1463
3-D Optimal Shape Design of Ferromagnetic Pole in MRI Magnet of Open Permanent-Magnet Type	1467
Shape Design Sensitivity for Force Density Distribution of Magnetic Systems	1471
Theoretical Analysis of HTS Windings Made of Bi(2223)/Ag Tapes Prepared by a Tape-in-Rectangular Tube Technique	1475
Contribution of Iron Yoke on Helical Coils	1479
Magnet Calculations at the Grenoble High Magnetic Field Laboratory.	1483
Mathematical Approach to Current Sharing Problem of Superconducting Triple Strands	1488
Compensation of Magnetization Effects in Superconducting Accelerator Magnets	1492
Mechanics	
Development and Manufacture of the Coil End Spacers of the LHC Pre-Series Dipoles	1496
The Use of a New Modular Approach in the Mechanical Design of Superconducting Magnets	1501
Mechanical Structure Analysis of a Compact Superconducting Wavelength Shifter.	1505
Dynamic Vibration Analysis of Switched Reluctance Motor Using Magnetic Charge Force Density and Mechanical Analysis	1511
The Thermal and Magnetic Stress Analyses of the ATLAS Barrel Toroid-B0 Coil	1515
Thermodynamics	
Investigation of Index Heating as Source of Quench in the NHMFL 45-T Hybrid Superconducting Outsert	1520
Transient Stability Analysis of the SeCRETS Experiment in SULTAN.	1524
Application of the Code THEA to the CONDOPT Experiment in SULTAN	1528
Method for Determination of the Conductor Current Sharing Temperature Using Traveling Heat Slug in the ITER TFMC	1533

Thermohydraulic Behavior of the WENDELSTEIN 7-X Magnet System	<i>M. Nagel and F. Schauer</i>	1537
Influence of Inlet Pressure and Mass Flow Rate on the Temperature Rise of Superconducting Strands in SSTF Under the Normal Operating Conditions	<i>C. S. Yoon, Q. Wang, Y. S. Suh, S. W. Choi, W. Chung, H. Park, and K. Kim</i>	1541
Quench Analysis		
Improved Quench Characteristics of Superconducting Racetrack Coil via Shape Modification	<i>S.-K. Baik, M.-H. Sohn, R.-K. Ko, Y.-K. Kwon, H.-J. Kim, E.-Y. Lee, and Y.-S. Jo</i>	1545
The Normal Zone Propagation in ATLAS B00 Model Coil	<i>E. W. Boxman, A. V. Dudarev, and H. H. J. ten Kate</i>	1549
Simulation of the Effect of a Series of Superconducting Magnets on a Quenching Magnet Using a Controlled Current Pulse	<i>A. Hilaire, A. Ijspeert, and J. C. Perez</i>	1553
Prediction of the Quench Current of a Large Magnet with a Small Model Test	<i>E. Yu. Klimenko and S. I. Novikov</i>	1557
High Current Arc Accidents in Superconducting Magnets	<i>V. E. Keilin, B. N. Kolbasov, and S. A. Lelekhov</i>	1561
Conduction Crisis and Quench Dynamics in Cryocooler-Cooled HTS Magnets	<i>Y. Lvovsky</i>	1565
Current Redistribution Under Imbalanced Condition in Cable-in-Conduit Conductors	<i>T. Mori, K. Takahata, and A. Nishimura</i>	1570
Deployment of MAGS, a Comprehensive Tool for Magnet Design and Safety Analysis, for Quench and Arc Simulation of an ITER-FEAT Coil	<i>V. Pasler, G. Bönisch, R. Meyder, and G. Schmitz</i>	1574
Current Degradation of Multi-Strand Superconducting Cable Caused by Non-Ideal Inductive Coupling Between Its Components	<i>V. R. Romanovskii</i>	1578
Investigation of the Cylindrical Superconducting Coil Quench Behavior	<i>P. Surdacki and T. Janowski</i>	1582
Quench Analysis of RIKEN Superconducting Ring Cyclotron	<i>T. Tominaka, N. Fukunishi, A. Goto, J. Ohnishi, H. Okuno, and Y. Yano</i>	1587
Simulation on Helium Expansion and Quench in CICC for KSTAR with Moving Mesh Methods	<i>Q. Wang, J. He, C. S. Yoon, W. Chung, and K. Kim</i>	1591
AC Losses		
A.C. Loss in a Stack of Flat Superconducting Cables	<i>A. A. Akhmetov</i>	1595
Magnetization Loss Measurements of Bi-2212 Round Wires Fabricated by Stranded-and-Formed Method	<i>N. Amemiya, Z. Jiang, K. Yamagishi, and T. Sasaoka</i>	1599
AC Losses in a BSCCO Current Lead: Comparison Between Calculation and Measurement	<i>B. Douine, D. Netter, J. Lévêque, and A. Rezzoug</i>	1603
AC Loss and Interstrand Resistance Measurement for NbTi Cable-in-Conduit Conductor	<i>S. Egorov, I. Rodin, A. Lancetov, A. Bursikov, M. Astrov, S. Fedotova, Ch. Weber, and J. Kaugerts</i>	1607
Investigation of AC Loss Characteristics of Bi2223 Twisted Multifilamentary Tape	<i>S. Fukui, M. Ikeda, T. Yoshida, T. Sato, and M. Yamaguchi</i>	1612
Long Time Constants of Irregular AC Coupling Losses in a Large Superconducting Coil	<i>T. Hamajima, N. Harada, T. Satow, H. Shimamura, K. Takahata, and M. Tsuda</i>	1616
Influence of Bending Strain on Transverse-Field Losses in NbTi Multifilamentary Superconducting Wires with Cu Matrix	<i>S. Kawabata and H. Tsuzura</i>	1620
Magnetic Field and Magnetization Loss Calculation in an HTS Transmission Cable Considering the Axial Field Component of SC Tape	<i>J.-k. Lee and G. Cha</i>	1624
Characteristics of AC Transport Current Losses in YBCO Coated Conductors and Their Dependence on Distributions of Critical Current Density in the Conductors	<i>D. Miyagi and O. Tsukamoto</i>	1628
Effect of Ferromagnetic Rings on Critical Current and AC Losses of a Coil Made From Bi-2223/Ag Tape	<i>M. Polak, P. Usak, L. Jansak, J. Kvitkovic, Z. Timoransky, and F. Zizek</i>	1632
Relation Between Inter-Sub-Cable Contact Resistance and Coupling Loss in Multiple-Stage Stranded Cable	<i>K. Seo, K. Fukuhara, and M. Hasegawa</i>	1635
Mechanical Losses and Frictional Properties of Bobbin Surfaces in AC Superconducting Coils	<i>T. Takao, T. Shoji, K. Kashiwazaki, A. Yamanaka, M. Takeo, and S. Sato</i>	1639
Influence of Current Distribution on Conductor Performance in Coaxial Multi-Layer HTS Conductor	<i>M. Tsuda, A. K. M. Alamgir, Y. Ito, T. Harano, N. Harada, T. Hamajima, M. Ono, and H. Takano</i>	1643
Field Measurements		
Bench Testing of Magneto-Optic Polarimeters for Long-Pulsed Fusion Devices	<i>T. Akiyama, R. Shimada, M. Takahashi, K. Terai, S. Tsuji-Iio, and H. Tsutsui</i>	1647
Optimization Analyses of the Magnetic Measurements on Multistrand SC Cables	<i>F. Bellina, P. Bettini, and F. Trevisan</i>	1651

Novel Approaches Toward the Development of Hall Sensor-Based Magnetometric Devices for Charged Particle Accelerators	<i>I. Bolshakova, R. Holyaka, and C. Leroy</i>	1655
Magnetic Measurement of Alignment of Main LHC Dipoles and Associated Correctors	<i>L. Bottura, M. Buzio, G. Deferne, P. Schnizer, P. Sievers, and N. Smirnov</i>	1659
Warm Magnetic Field Measurements of Prototype Low- β Quadrupole Magnet MQXA for the LHC Interaction Regions	<i>H. Hirano, N. Ohuchi, Y. Ajima, T. Ogitsu, T. Shintomi, K. Tsuchiya, and A. Yamamoto</i>	1663
Self Field Measurements by Hall Sensors on the SeCRETS Long Sample CICC's in SULTAN.	<i>Yu. A. Ilyin, A. Nijhuis, H. H. J. ten Kate, and P. Bruzzone</i>	1667
Influence of Neutron Irradiation on the Parameters of Field Hall Plates	<i>V. K. Makoveev, M. M. Filatov, V. P. Goncharov, A. V. Karpukhin, V. M. Lachinov, A. V. Leonov, and V. N. Mordkovich</i>	1672
Analysis of the Current Distribution in the ITER CS-Insert Model Coil Conductor by Self Field Measurements	<i>A. Nijhuis, Yu. A. Ilyin, and H. H. J. ten Kate</i>	1675
A Tool for Simulating Rotating Coil Magnetometers	<i>L. Bottura, M. Buzio, P. Schnizer, and N. Smirnov</i>	1680
The Measurement Bench for the LHC Spool Corrector Magnets in Industry.	<i>A. Arn, S. A. Arshad, C. Giloux, F. Patru, H. Reymond, R. Senis, and L. Walckiers</i>	1684
A System for Series Magnetic Measurements of the LHC Main Quadrupoles.	<i>N. Smirnov, L. Bottura, F. Chiusano, O. Dunkel, P. Legrand, S. Schloss, P. Schnizer, and P. Sievers</i>	1688
Analytical Calculation of Field Error Due to Radial Coil Distortions of the LHC Low-Beta Quadrupole Magnets	<i>K. Sugita, T. Ogitsu, T. Nakamoto, N. Ohuchi, H. Hirano, T. Shintomi, K. Tsuchiya, and A. Yamamoto</i>	1693
Stress/Strain Measurements		
Performance Test of a CuNb Reinforced (Nb, Ti) ₃ Sn Coil Fabricated by the React and Wind Method	<i>S. Awaji, K. Watanabe, G. Nishijima, K. Takahashi, M. Motokawa, K. Jikihara, H. Sugizaki, and J. Sakuraba</i>	1697
Mechanical Characterization of the Tie Rods for the ATLAS B0 Model Coil	<i>F. Alessandria, F. Broggi, and M. Toderò</i>	1701
Modeling of Coil Pre-Stress Loss During Cool-Down in the Main Dipoles of the Large Hadron Collider	<i>P. Ferracin, W. Scandale, E. Todesco, and D. Tommasini</i>	1705
Analysis of Conductor Displacements in the Coil of the LHC Main Dipole by Speckle Interferometry	<i>P. Ferracin, P. Rastogi, W. Scandale, E. Todesco, and P. Tropea</i>	1709
Measurements of Geometry and Alignment		
Influence of Geometrical Parameters on the Flexural Rigidity of the LHC Dipole Cold Mass Assembly.	<i>M. Bajkó, R. Chamizo, and A. Pardons</i>	1713
Metrology of the LHC Dipole Cold Masses	<i>M. Bajkó, A. Pardons, and F. Savary</i>	1718
Analysis of Lamination Measurements for CERN's Twin Aperture Quadrupoles	<i>G. S. Clark</i>	1723
Impact of Coil Deformations on Field Quality in the Large Hadron Collider Main Dipole	<i>P. Ferracin, O. Pagano, V. Remondino, W. Scandale, E. Todesco, and D. Tommasini</i>	1727
A Novel Device for the Measurement of the Mechanical and Magnetic Axes of Superconducting Magnet Assemblies for Accelerators	<i>J. Garcia-Perez, S. Aznar, J. Billan, F. Fischer, P. Galbraith, S. Goy, N. Mermillod, G. Peiro, G. Patti, and C. Rathjen</i>	1731
Optical <i>In-Situ</i> Measurement of Relative Deformations of the LHC Main Dipole Cold Masses	<i>S. Aznar, J. Billan, J. Garcia Perez, M. La China, P. Ferracin, S. Redaelli, W. Scandale, and E. Todesco</i>	1736
Others		
A Detailed Study of the Design, Construction and Cryo-Operation of an HTS Magnet	<i>P. E. Richens and H. Jones</i>	1741
Strand Movements in Cable-in-Conduit Conductors	<i>K. Takahata and T. Satow</i>	1747
A Study on the Forming of CICC for the Superconducting Tokamak Device with Post-Forming Predictions via Virtual Manufacturing	<i>Y. S. Suh, C. S. Yoon, S. W. Choi, H. Park, and K. Kim</i>	1751
An Evaluation of Mechanical Properties of YBaCuO and (Sm,Gd)BaCuO Bulk Superconductors Using Vickers Hardness Test at Cryogenic Temperatures.	<i>Y. Yoshino, A. Iwabuchi, K. Katagiri, K. Noto, N. Sakai, and M. Murakami</i>	1755
