In the above paper [1], there is an error in equation (7)

$$H_R = (0.9437S_D / (0.8865 + 2.2913S_D))^6, \quad R^2 = 0.93. \quad (7)$$

The last coefficients should be interverted. Instead of  $H_R = [0.9437S_D / (0.8865 + 2.2913S_D)]^6$  it should be read:  $H_R = [0.9437S_D / (0.8865S_D + 2.2913)]^6$ .

The equation should be as follows:

$$H_R = [0.9437S_D / (0.8865S_D + 2.2913)]^6, \quad R^2 = 0.93. \quad (7)$$
